

GFE®
lifebuoy housing

Rescue is **always** at hand!

We save lives

Thanks to GFE lifebuoy housing, rescue is never far away. No water amenity (streams, rivers, lakes, industrial holding pools) should be without a GFE lifebuoy-housing unit. As a conspicuously-placed GFE lifebuoy-housing unit can save countless lives

One vital element of course is that lifebuoy housing needs to be installed safely and securely. That's why all GFE lifebuoy housing can be mounted on poles, rails and walls alike, making them highly visible and unmistakably recognizable, even from afar.

Closed GFE®

Protects the lifebuoy from the most extreme weather conditions yet can be opened by anyone quickly and easily. The front panel stays open (the cover closes slowly) leaving the hands free to grasp the lifebuoy and rescue line. The throwing line cord (30 or 50 metres) can easily be stowed away. There is also space for a buoy line holder.

- The GFE 24 is suitable for 600 mm buoys.
- The GFE 30 is suitable for 750 mm buoys.

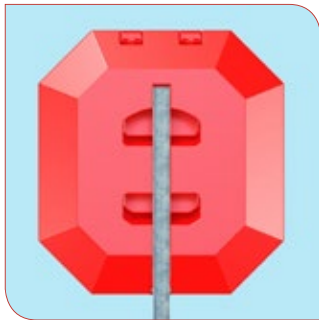

Model GFE® Plex 30

Buoy and line are always visible in this cabinet with a transparent cover. Only available for 750 mm buoys.

Life hook

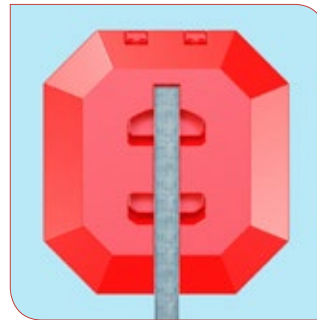

Made from 14-mm galvanized, compressed steel with a 6-metre-long aluminium pole.

40 x 60 mm

GFE® 30/60

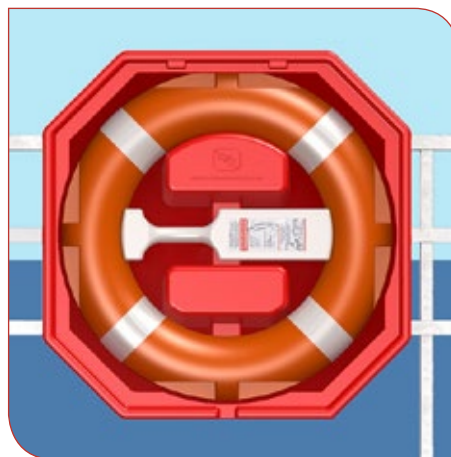

Can be attached to a 2000 mm or 1500 mm pole with 4 M10 mounting holes. Installation of these poles every 400 metres is ideal.

100 x 60 mm

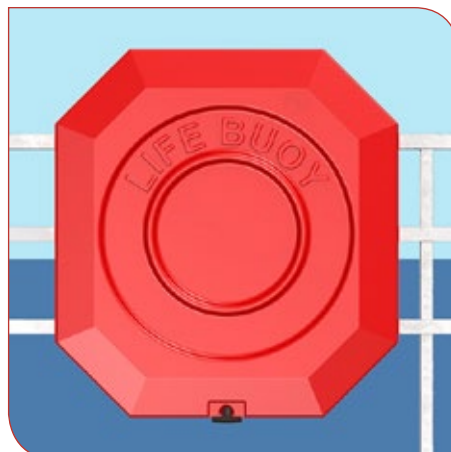

GFE® 30/100

Can be attached to a 2100 mm or 1600 mm pole with 4 M10 mounting holes. Installation of these poles every 400 metres is ideal.

Open model GFE® 30

- Dimensions 840 mm x 840 mm
- Thickness 207 mm
- Translucent plexi cover can be ordered separately.

GFE® 30

The cabinet is attached to the rail using a pre-galvanized bracket. An image of a life buoy and the words "Life Buoy" are imprinted on the cover.

Technical description

The GFE® lifebuoy cabinets are made of durable, impact-resistant polyethylene. This material is chemical-resistant and is mass-dyed a bright red during the production process. Orange is also possible, but only by special order. This durable material is UV-resistant and colourfast. Various sizes of lifebuoy can be hung up in the GFE® life buoy cabinet. The specially designed hinge is corrosion-proof and protects against vandalism. Stowed away in the centre of the lifebuoy cabinet is a polypropylene throw line. The crossbar lock keeps the cover tightly closed in all conditions and is easy for anyone to open in an emergency. GFE® lifebuoy cabinets are not only a long-term solution, they are a sustainable addition to any safety equipment solution, certainly in places where people and water meet.

Technical specifications

Type GFE 24

Diameter 600 mm

Outside dimensions: 780 x 685 x 190 mm

Weight of the GFE® cabinet: 7.5 kg

Type GFE 30

Diameter 750 mm

Outside dimensions: 940 x 875 x 202 mm

Weight of the GFE® cabinet: 11.5 kg

All GFE® cabinets include a standard lifebuoy with a diameter of 600 mm (with a 30-meter plastic throw line) or 750 mm (with a 30- or 50-metre plastic throw line with a diameter of 8 mm). The cover is secured with a crossbar lock.
